
Advantages Of the Cardiatis Multilayer Stent Presented at the VEITH Symposium

Advantages of the Cardiatis Multilayer Stent in the Treatment of Aneurysmal and Occlusive Disease will be presented at the 34th Annual VEITH symposium in New York. Dr. Armando C. Lobato, Chief of Endovascular Surgery at São Paulo Institute is presenting.

Brussels, Belgium – November 14, 2007 – Advantages of the Cardiatis Multilayer Stent in the Treatment of Aneurysmal and Occlusive Disease will be presented at the 34th Annual VEITH symposium in New York. Dr. Armando C. Lobato, Chief of Endovascular Surgery at São Paulo Institute Vascular and Endovascular Surgery Institute in Brazil is presenting.

The presentation is part of a session covering new developments and technical advances in thoracic and abdominal aneurysm repair. Updates and recent findings will be part of a panel discussion moderated by John E. Connolly, MD and Kenneth Ouriel, MD.

VEITH symposium provides vascular surgeons, interventional radiologists, interventional cardiologists and other vascular specialists with a unique and exciting format to learn the most current information about what is new and important in the treatment of vascular disease.

Cardiatis Multilayer Stenting Technology offers an innovative approach that simplifies the treatment of aortic aneurysms. Its low profile fluid modulating properties make endovascular aortic aneurysm repair as simple as a standard stenting procedure.

About Cardiatis

Cardiatis, an innovative medical technology company located in Belgium, is focused on developing its patented FluidSmart 3D multilayer stent technology platform, a next generation technology for endovascular aneurysm repair.
